Setting the New Standard.

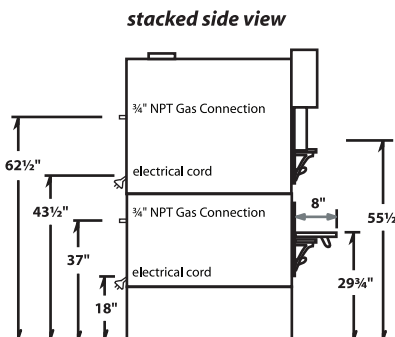

THE WAVE OVEN

FEATURES

WAVE DESIGN

- **Revolutionary "Wave" Design** firebrick-lined backing chamber forces the heat from the burners back down on top of the cooking surface
- **Brick-Lined Baking Chamber**- The cooking surface is 2" thick brick and the rear and arched ceiling of the chamber is lined with refractory brick providing more heat retention so your oven won't quit.
- **Open 40,000 BTU Side Burner** brings the baking chamber temperatures to over 900°F
- **Viewing Window** allows you and your customers to see the flame from the side burner giving that old-world appeal
- **Dual Controls** allow you to independently control the main burner and side burner temperatures and a thermometer allows you to see exactly what temperature the baking chamber is so that you can easily make adjustments.
- **Two Sizes and Stacked with MB Ovens** - Ovens can be ordered as a single or stacked unit with either the MB42 or MB60 ovens on the bottom. Get the best of both.
- **Finish it to Fit Your Decor** - factory finish allows you to decorate the oven with brick or tile, or choose the optional stainless steel finish.
