

CHOPPER / GRINDER ATTACHMENTS

ECONOMY ATTACHMENTS FOR HOBART

Designed for Hobart-style power hubs, our 12 SS CCA, 12 H CCA and 12 H CRW are more economical versions of Hobart's meat-grinder power attachments. The grinder attachments labeled "Complete" below (12 H CCA, 12 SS CCA, 12 CH, 22 H CCA and 22 SS CCA) all come with a stainless steel pan, stomper, 1/4" plate, chopper knife, cylinder ring & worm. (The 12 SS CCA also includes a heavy-duty 3/4" stuffing tube.) Alfa's chopper plates and knives fit these attachments.

Note: These attachments fit most Mixers, Grinders, Food Cutters and Power Units with a standard Hobart-style size #12 or #22 Power Hub. The components for the attachments below are intended as replacement parts only for ALFA attachments and not for equivalent products from different manufacturers.

Note: These grinders should NOT be used to process poultry, seafood, cheese or vegetables – beef, pork, and venison only
